Her progress should travel beyond the scorecard.

Turn everyday training into a personal record, useful coach context and chosen moments of visibility.

BATTING | BOWLING | FIELDING

Presented by Vijaya Rupesh N

THE PROBLEM TO VALIDATE

01 Fragmented progress

Practice records can get lost between matches and messages.

02 Limited visibility

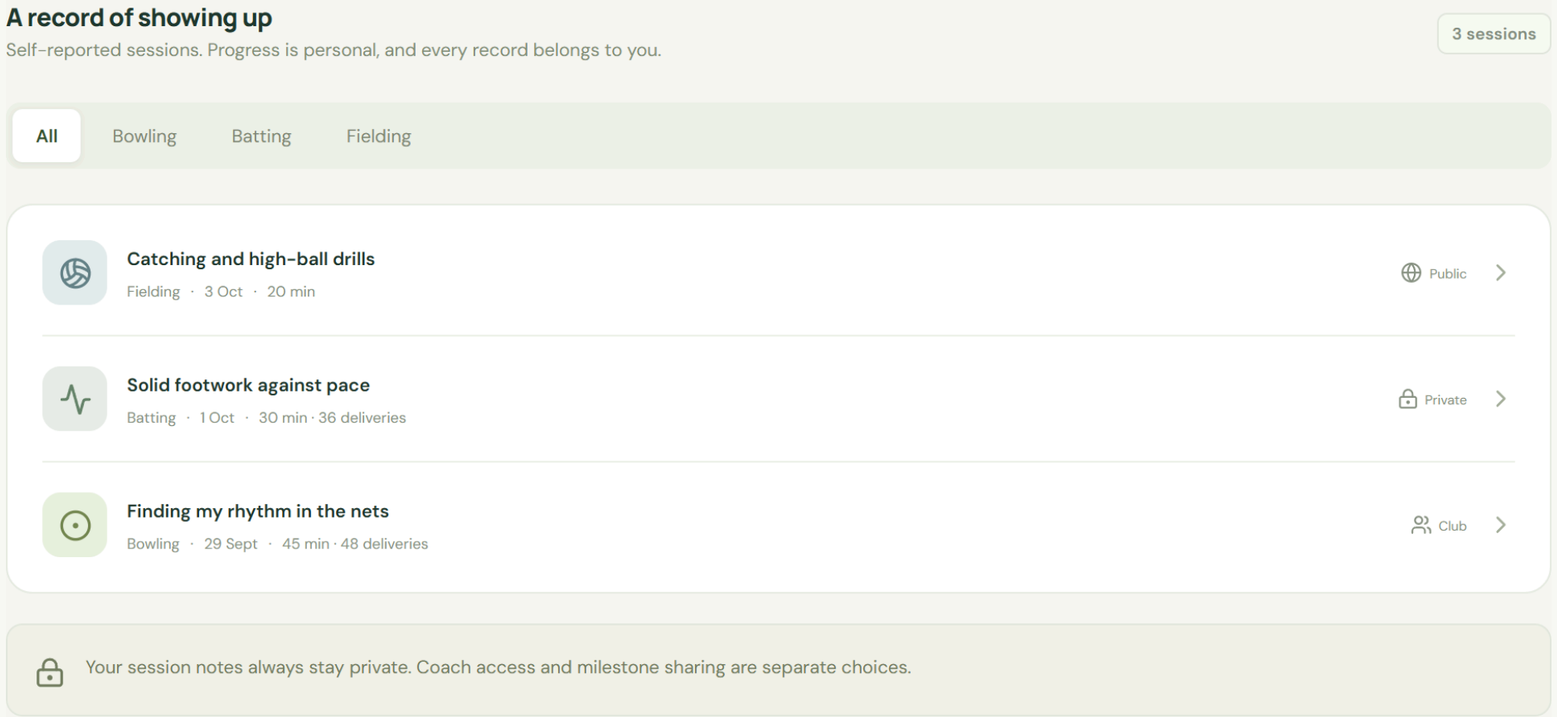

Everyday effort deserves a story beyond match-day statistics.

03 Control over sharing

Women athletes should choose what to share and with whom.

Record privately. Make progress visible.

A cricket-specific journey with separate choices for coach access and milestone sharing.

CURRENT PROTOTYPE • FICTIONAL RECORDS

01 Record

Session type, duration, effort and a private reflection.

02 Understand

Weekly history and comparison with the athlete’s own plan.

03 Choose the audience

Keep private, share a milestone, or allow coach access separately.

A working core. A clear path to scale.

Simple inputs → transparent summaries → athlete-selected visibility

01 / WORKING TODAY

Cricket records

React web prototype
Batting, bowling, fielding logs
Weekly history and goals
Rule-based explanations
Sharing and coach demo views

02 / RESPONSIBLE AI

Grounded guidance

Current insights use rules.
Planned AI explains logged data and helps draft milestones, with athlete review before posting.
No injury-risk prediction.

03 / PRODUCTION PATH

Trust before rollout

Add sign-in and verified roles
Enforce consent on the server
Move to a managed database
Test access and data deletion
Adapt rules for other sports

Demo: local / browser persistence and simulated roles. No ICC data integration or live athlete pilot claimed.

Start with women’s cricket. Earn the right to scale.

VALIDATE WITH WOMEN ATHLETES

20 athletes · 4 weeks

Proposed adult-player pilot; recruitment pending.
Start directly with players; no club deal required.

Measure logging time, weekly return, sharing comprehension and usefulness of progress records.

Ask: ICC / Ignyte introductions to women athletes for interviews, usability testing and an opt-in pilot.

VALUE & VIABILITY

Players: progress records. Coaches: chosen context.
Communities: athlete-approved milestones.

Planned model: free core player access; paid club tools.
Mobile web, no wearable needed; Hindi summary.
Small text records limit storage and compute needs.
